

# Services on fsgw2.org

fsgw2.org is a shared hosting account, provided by [DreamHost](#). It provides multiple virtual servers, one at the base domain name of fsgw2.org, and others at subdomains of our choosing, for example: [wiki.fsgw2.org](#), [wp.fsgw2.org](#), and [wff.fsgw2.org](#). The limit on the number of subdomains might be 25. The de-facto limit is how many we have the time and energy to set up and maintain.

DreamHost used to provide fsgw2.org free-to-nonprofits, but they stopped offering that somewhere between 4Q2025 and 1Q2026, so it will cost FSGW money thereafter, probably \$10.99-\$12.99 per month (\$131.88-\$155.88 annually) plus \$19.99 per year for the fsgw2.org domain name. See <https://www.dreamhost.com/hosting/>.

A huge benefit of having multiple virtual servers is that the software installed on one does not impact the others, for example: [wiki.fsgw2.org](#) has DokuWiki installed, [wp.fsgw2.org](#) has WordPress installed, and [wff.fsgw2.org](#) has some FSGW developed software to support WFF. Each package can put its page tree at the root, avoiding contortions to accommodate multiple competing page trees on one (virtual) server.

## Newsletter Archive storage
