What is in this wiki? How can I find things?

For a high level view, see the Sitemap

1. Click the 'Sitemap' button near the upper right, just below the 'Search' box.
2. A list of the Namespaces (blue) and pages (green) in the wiki is displayed.
3. Click on a page title to display that page.
4. Click on a Namespace to show/hide a list of the pages in that namespace.
5. 'Playground' and 'wiki' namespaces are built in. All other namespaces are for access control.
6. If clicking on a namespace doesn't open it, then you do not have access to it.
   - No access if you are not logged in to the wiki, so the button in the upper right says 'Log in' instead of 'Log out'.
   - No access if you are logged in to the wiki, but do not have access to that namespace.

To search for words, use the 'Search' box in the upper right

1. Enter your search word(s) in the 'Search' box and tap Return/Enter.
   - As you type, a quick list of matching pagenames will appear floating to the left of the Search box.
   - When you tap Return/Enter, then a full list of 'Matching pagenames' and 'Fulltext results' is displayed.

To see where a page is linked from in the wiki - its "parents" or "Backlinks"

- Click on the third (Backlinks) icon to the right of the main window. The icon looks like a diagonal paperclip, and when you hover over those icons, the title "Backlinks" is displayed.
